

THE ULTIMATE PORTABLE!

SOLTON B1000S

The Solton B1000S represents the ultimate in portable keyboards. Never before has such an instrument been available, combining unbelievable tonal specification with portability and reliability.

Using the very latest microprocessor technology, the B1000S faithfully reproduces all the sounds required by modern keyboard players.

SPECIFICATION

Try the sound of the drawbars – using overdrive and chorus it is indistinguishable from the famous "Tonewheel" sound!

Symphonic strings on upper and lower manuals (with independent sustain control) allow the organ to become an ORCHESTRA. A choice of 4 piano voices will recreate the sound of a concert grand to an electric piano. Try any of the 30 upper manual synthesizer presets, each one producing an uncannily accurate reproduction of the selected instrument.

The Rhythm section is by far the most advanced unit available today. From a choice of 64 rhythms. YOU can choose the rhythm instruments you wish, the type of auto bass, the type of auto accompaniment. Play one note on the lower manual – the disco 64 unit will provide you with a complete chord with walking bass. Now play 3 or 4 notes, the disco 64 automatically changes from O.F.C. to "Finger Chord" system. No need to alter the setting of the unit. Need to play 9th, 11th, flattened 10th, M9th chords? Simply play the chord and 1 bass pedal for the required root! Disco 64 will let you be as much of a musician as you choose!

PORTABILITY

The B1000S weighs only 55kg! This is lighter than some electric pianos! No more back breaking struggles, and inconvenience caused by cumbersome and ungainly instruments. The cabinet has sockets for clip in wheels (optional) to make movement of the organ still easier.

RELIABILITY

The B1000S has been designed by literally some of the best technicians in the world today. In their search for the ultimate reliability they have selected only the very highest quality components which are assembled under the strictest conditions in brand new air-conditioned assembly lines.

PLAYABILITY

Many combination keyboards on the market today require an organist to be a technician first, a musician second. The B1000S, although built electronically by technicians, was designed by Solton's top musicians. You will find everything where you would expect it.

ALL IN ALL, WE'RE SURE YOU'LL AGREE, THE SOLTON B1000S MUST BE THE ULTIMATE PORTABLE ORGAN!

SOLTON TWIN JET & MINI TWIN AMPLIFIERS.
THE PERFECT COMPLEMENT TO THE B1000S!
